

### New Control System with Diagnostics

We Have Redesigned The Controls From Scratch.

### Long Y-Axis Treatment

Cervical Headwear That Lifts Patient's Head Up.

### Patented Cervical Headpiece

Removes the Necessity for a Cervical Drop, Eliminates the Need for High Velocity Treatment, Thus Eliminating the Risk of Physical-based Injury to the Patient and Gives the Provider the Ability to Provide Full Cervical Treatment in a Low Velocity Manner.

### Improved Cable Routing

Cleaner Appearance, Improved Safety.

### Improved Thoracic Drop Tension Adjustment

Larger Knob & Smooth Adjustment Motion.

### Extra Beefy Pivot Mounts

Provides Smooth Lateral Movement Even For Your Larger Patients.

### Force Technology

Embedded Technology in the Thoracic and Caudal Sections of the Table that Gather in Real Time Objective Biomechanical Data on the Forces Applied to the Patient. This Yields Proof of Efficacy in the Treatment Plan Designed by the Doctor to Ensure Genuine Healing is Taking Place.

### Caudal Tiller Bar

Controls Functionality of the Table in an Orientation That Allows Practitioner to be Vertical VS Bent Over the Table. Better Ergonomics.

### Precision Balanced Caudal Section

The Other Side of the Table Allows Practitioners to Allow Treatment with the Effort of One Finger.

### Rock Solid Foundation

Keeps The Table Firmly Planted While You Work.

Standard Base Shown. Also available in Low Base Model.
